

Dear Senate Natural Resources, Environment, and Great Lakes Committee,

I am writing to urge you to vote "NO" on SB 1350, a bill that would add our grey wolves to the list of game animals in Michigan. I spent a week on Isle Royale a few summer's ago in order to see the wolves (I was unsuccessful), and do not support a change in their status due to the fact that they are not overpopulated and very few Michiganders have even been able to see them at their current still-low numbers.

These are beautiful creatures that represent the pristine habitats we encourage tourists to visit in our state each year, and to turn their presence into just another opportunity for sport killing – just because we can -- is wrong and uncalled for.

Bottom line: our grey wolves are worth more alive than dead!

Please add these comments to the official record for consideration.

Thank you for your time.

Sincerely,

Jodi Louth
